Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims are 24-26 allowed.
2. Claims 22-23,30-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 20,21 rejected under 35 U.S.C. 102(e) as being anticipated by Takayuki (2000-208825).

Takayuki discloses a spring biased mechanism in fig. 1 and 2 comprising: a movable element (24), biasing spring (29a), a spring preloaded force adjustor (28) including a piezoelectric device (26a) operably coupled to the spring and support structure; a electrical actuator (10) operably coupled to the moveable element in opposition to the

biasing spring. Wherein, the spring pre-loaded force is a function of a voltage applied (35) to the piezoelectric device.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takayuki (2000-208825).

As seen above paragraph 1, Takayuki disclose substantially the claim invention, however the reference does not disclose the use of a second spring and piezoelectric device.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to duplicate the piezoelectric actuator and springs since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the arts. St. Regis Paper Co., Bemis Co., 193 USPQ 8.

It also would have been obvious to having ordinary skill in the art to use multiple actuator systems with similar characteristics for the purpose of providing actuation in multiple dimensions.

Response to Arguments

Applicant's arguments with respect to claims 20-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen B Addison whose telephone number is 703-306-5855. The examiner can normally be reached on 8:00 to 4:30.
